

IBM Informix Web DataBlade Module

Version 4.13

Quick Start Guide

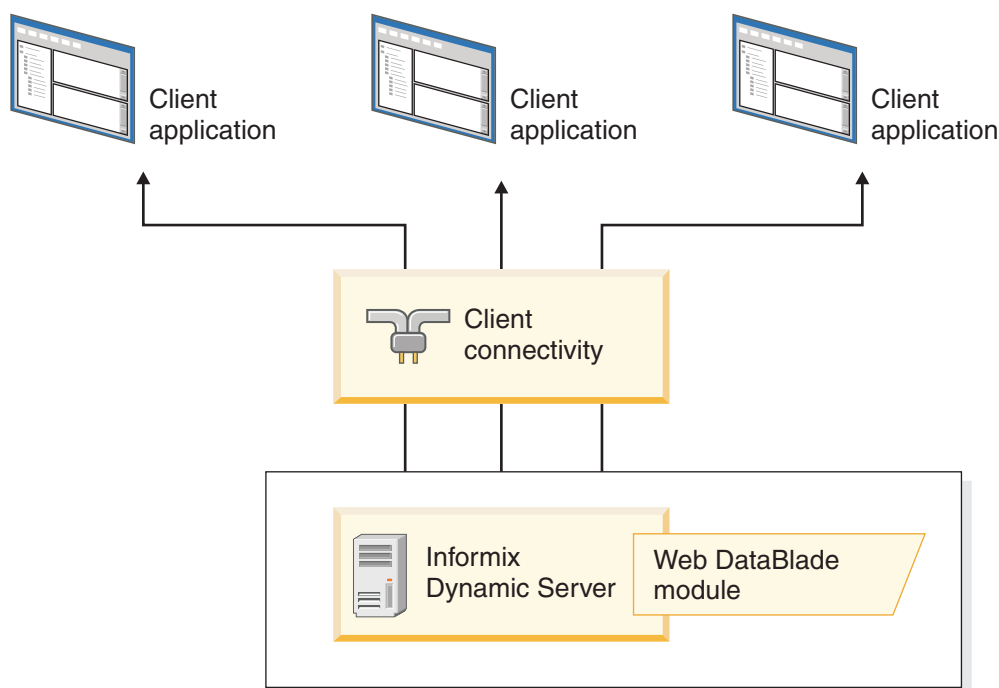

This guide is intended to get you started with a basic installation of the IBM Informix Web DataBlade Module.

Product overview

IBM® Informix® Web DataBlade® Module simplifies the development of Web-enabled applications that interact with and use object-relational data from IBM Informix Dynamic Server (IDS) databases.

The following diagram provides an overview of the base architecture of the Informix Web DataBlade Module with IDS.

1 Step 1: Access your software

You can install the Informix Web DataBlade Module from the provided installation media, or you can download the installation package from the Informix download site at: <http://www.ibm.com/software/data/informix/downloads.html>.

The installation package includes the IBM Informix Web DataBlade Module CD and product documentation.

2 Step 2: Access your documentation

For installation information, see Step 3.

For information about using the Informix Web DataBlade Module, see the *IBM Informix Web DataBlade Module Administrator's Guide* at: <http://www.elink.ibm.com/publications/servlet/pbi.wss?CTY=US&FNC=SRX&PBL=SC23-9518-00> and the *IBM Informix Web DataBlade Module Application Developer's Guide* at: <http://www.elink.ibm.com/publications/servlet/pbi.wss?CTY=US&FNC=SRX&PBL=SC23-9517-00>.

3 Step 3: Install the Informix Web DataBlade Module

To install and use the Informix Web DataBlade Module in your database:

1. Log in as the **informix** user.
2. Go to the directory where the installation file is located and run one of the following installation commands:

Default console mode	<code>web.4.13.xCn.platform.bin</code>
GUI mode	<code>web.4.13.xCn.platform.bin -i gui</code>
Silent mode	<code>web.4.13.xCn.platform.bin -i silent</code>

Where *x* indicates the type of operating system, *n* indicates the fix pack level, and *platform* is the UNIX[®] or Linux[®] platform, for example AIX[®].

3. Confirm the location of the installation when prompted; the default location is the directory specified by the INFORMIXDIR environment variable. To install in an alternate Informix instance, specify the top-level directory of that installation.
4. Complete the panels or prompts in the installation application.
5. Make the Informix Web DataBlade Module available to a database by registering it in that database. See the *IBM Informix DataBlade Module Installation and Registration Guide* in the IDS information center for details.

Read Documentation and Machine Notes

After installation, read important online notes and product documentation, which are located in `$INFORMIXDIR/extend/web.4.13.xCn/doc`.

Uninstalling the Informix Web DataBlade Module

Use the following procedures to uninstall the Informix Web DataBlade Module:

1. Enter: `$INFORMIXDIR/Uninstall_web.4.13.xCn`
Where *x* indicates the operating system type and *n* indicates the fix pack level.
2. Run the following command: `Uninstall_web.4.13.xCn`

More Information

For more information about Informix Web DataBlade Module and installation go to the IDS information center at <http://publib.boulder.ibm.com/infocenter/idshelp/v1115/index.jsp>.
